CONTENTS

Foreword 1

The characters of supercuspidal representations as weighted orbital integrals . . . . . *James Arthur* 3

On the proof of the reciprocity law for arithmetic Siegel modular functions . . . . . *Walter L Baily Jr* 21

On some generalizations of Ramanujan's continued fraction identities . . . . . *S Bhargava, Chandrashekar Adiga and D D Somashekara* 31

On the set of discrete subgroups of bounded covolume in a semisimple group . . . . . *A Borel* 45

Explicit Ramanujan-type approximations to pi of high order. . . . . *J M Borwein and P B Borwein* 53

Almost poised basic hypergeometric series. . . . . *David M Bressoud* 61

On Whittaker models and the vanishing of Fourier coefficients of cusp forms . . . . . *Stephen Gelbart and David Soudry* 67

On prime representing polynomials. . . . . *Emil Grosswald* 75

(GL_n, GL_m)-duality and symmetric plethysm. . . . . *Roger Howe* 85

The area within a curve. . . . . *M N Huxley* 111

On the nonvanishing of some L-functions . . . . . *Hervé Jacquet* 117

On exponential sums involving the Ramanujan function . . . . . *M Jutila* 157

Approximation of exponential sums by shorter ones . . . . . *A A Karatsuba* 167

On endomorphisms of degree two . . . . . *Max Koecher* 179

Traces of Eichler-Brandt matrices and type numbers of quaternion orders . . . . . *Otto Körner* 189

The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions . . . . . *Aloys Krieg* 201

Poincaré series for $SO(n, 1)$ . . . *Jian-Shu Li, I Piatetski-Shapiro and P Sarnak* 231

Fluctuations in the mean of Euler's phi function . . . . . *Hugh L Montgomery* 239

On the supersingular reduction of elliptic curves . . . . . *M Ram Murty* 247

The Manin–Drinfeld theorem and Ramanujan sums . . . . . *V Kumar Murty and Dinakar Ramakrishnan* 251

On Ramanujan's modular identities . . . . . *S Raghavan* 263

Hypergeometric series and continued fractions . . . . . *K G Ramanathan* 277

Multiplicative properties of the partition function . . . . . *A Schinzel and E Wirsing* 297

The states of the character ring of a compact group . . . . . *V S Varadarajan* 305

On an approximate identity of Ramanujan . . . . . *D Zagier* 313
